**IEEE International Parallel &
Distributed Processing Symposium**

**Call for IPDPS Steering Committee Nominations
June 2024**

At its 2023 annual meeting, the IPDPS Steering Committee (SC) voted to recompose the committee in a phased manner over 2023-2026. All members on record as of IPDPS 2023 will retire by IPDPS 2026. See IPDPS Website for updated Steering Committee.

Nominations are sought for SC members. The membership will be for three years, and renewable for three more years based on participation. The membership will be limited to at most two terms. Nominations can be made throughout the year, however, early submissions (by October 1) are strongly encouraged. Nominations will be discussed as they arrive by the Steering Committee, and it will make its recommendations to the SC Chair.

Nominations should include:
- Name, affiliation, and professional history
- Details of participation at IPDPS over the years (e.g., PC member, volunteer, published at IPDPS, workshop organizer, student volunteer, author)
- Highlights of service to the parallel and distributed processing community
- Motivation and reasons for wanting to serve on the SC
- Commitment to participate in person at the annual SC meetings.

Nominations should be in plain text and are limited to one page. Nominations should be sent via email to volunteer@ipdps.org. Attachments are not permitted; however, you may include links. Self-nominations are allowed.

IPDPS is committed to diversity, equity, and inclusion in all of its activities, and aims to recruit volunteers representative of the diversity of the research community.
